

## Computing/IT Pearson Level 2 Extended Certificate

Study Mode: Full Time Programme Component | Course Level: 2

### Is this course right for me?

Are you looking for a career as a Web Developer, Games Designer or Network Administrator?

BTEC Level 2 qualifications are designed to provide specialist work-related learning and this course will give you the solid foundation you need to fulfill your ambition.

You will get the opportunity to develop your skills and knowledge in the following areas: System Support, Games Software Development and IT and will learn by completing projects and assignments based on realistic workplace situations.

The course will provide you with the knowledge, understanding and skills needed to prepare for a job in the industry or provide career development opportunities if you already in a job. It will also enable you to progress to a Level 3 programme or an apprenticeship.

We have a 100% achievement rate on this course and excellent feedback from our students.

This is a one year full-time course.

Also, if you earn less than £30,000 per year and aged 19 or over, you could study this course for FREE!

### Entry Requirements

To access this course you are required to have:

- A minimum of four GCSEs at grade D/3 or above, including maths, English and, ideally, one technical subject such as science, IT, graphics, design & technology, etc OR
- Level 1 ICT-related qualification at distinction/merit level, including maths and English and grade D/3 or above

### What will I learn?

During this course you will study the following modules:

- The online world
- Technology systems
- A digital portfolio
- Creating digital graphics
- Mobile apps development
- Website development
- Installing and maintaining computer hardware
- Automated computer systems

## What skills will I gain?

By studying this course you will:

- Learn how to use IT software to communicate and exchange information safely, securely and effectively
- Learn what characteristics are valued by employers and understand the common job roles undertaken by people working in the IT industry
- Learn the basic hardware and software components that make up computer systems and carry out basic installation and configuration
- Develop skills to enable you to create, design and publish a multi-page website for a local company
- Understand the social impacts of computer games and have the opportunity to design and test a simple game
- Develop skills to produce computer graphics, using the software and hardware required to generate and manipulate computer generated images

## How will I be assessed?

There are two externally examined units. The remaining units are completed through assignment submissions with some observations carried out by your tutors.

## What can I do next?

The skills you will learn from this course will enable you to:

- Pursue a career in the computing and IT field in a range of roles including games designer, network administrator, website developer, IT analyst, IT technician
- Progress on to the BTEC National Level 3 Computing Specialist course or an apprenticeship
