Course Information

Polymer - Blow Moulding Technology Part 2

Study Mode: Part Time

Is this course right for me?

This course is designed to introduce candidates to the fundamental principles associated with running an extrusion blow moulding machine together with its associated ancillary equipment and is appropriate to an NVQ Level 2 standard of performance. The course is a blend of theory and practical application sessions, to provide a basic understanding of the extrusion blow moulding process and associated working practices.

Delivery Information

This duration of this course is 4 days

This course will run from the following dates:

- 26 January 2026
- 13 April 2026
- 19 October 2026

Cost per person: £1,600

Entry Requirements

Candidates should have been employed within an extrusion blow moulding environment for a period of no less than 3 months and have some knowledge of the process requirements, or they should have completed our pre-course questionnaire and achieved a score of 25% or above. Examples of who should attend include:

- Operators who could then assist with routine start-up & shut-down
- Production and Product Design or Development Engineers
- Logistics and Procurement staff
- Toolroom and Maintenance personnel

What will I learn?

On completion of the course, the delegates will be able to:

- Identify process hazards, state safety requirements and apply safe working practices
- Start-up and shut-down an extrusion blow moulding machine safely and efficiently
- Detail the basic construction, control and operation of an extrusion blow moulding machine
- Identify relevant ancillary equipment and describe its usage
- Describe common die construction principles and simple maintenance procedures
- Describe the nature of plastic materials and list common types and grades
- List common extrusion blow moulding problems and suggest remedial actions
- State common quality systems, techniques and quality requirements associated with the extrusion blow moulding process

What skills will I gain?

Polymer Processing Certificate Part 2. Material covered has been aligned to the content of an NVQ at Level 2 and can be used as underpinning knowledge towards achieving the award, if so desired.

How will I be assessed?

Individual candidate knowledge levels are assessed both pre and post course attendance, after which a management report is provided to help identify any further training requirements or career progression possibilities.

What can I do next?
