

## **Engineering Maintenance Technician Level 3 Apprenticeship Standard (Electrical and Mechanical)**

Study Mode: Work Based Learning

### **Is this course right for me?**

If you're interested in both electrical and mechanical systems and want a varied role where no two days are the same, this course is perfect. It's suited to people who enjoy practical challenges and want to build versatile skills valued across industries.

### **Entry Requirements**

Determined by the employer, but you'll need at least a Grade C/4 in Maths before enrolment.

### **What will I learn?**

### **What skills will I gain?**

- Identifying and repairing both electrical and mechanical faults
- Inspecting and maintaining a wide range of plant and equipment
- Reading electrical schematics and mechanical drawings
- Preparing and restoring work areas for different systems
- Clear communication and teamwork across disciplines

### **How will I be assessed?**

Assessment will include:

- Practical, work-based tasks observed by assessors
- Written assignments and portfolio work
- A final end-point assessment to confirm competence in both areas

## What can I do next?

You could progress to roles such as:

- Multi-skilled Maintenance Technician
- Service Engineer
- Advanced apprenticeships or higher-level engineering study
- Specialising in fields like automation, robotics, or technical support
