

Free* Level 3 and Level 4 Hybrid and Electric Vehicle Training Available now

Across the U.K. less than 4% of the vehicle technician network is qualified to carry out work safely on high voltage Electric Vehicle (EV) systems. Therefore, now is the perfect time to electrify your current qualifications to include Hybrid & EV technologies.

Here at the City of Wolverhampton College we provide market leading training delivered by specialist Hybrid & EV technical trainers, with all courses certificated and quality assured by The Institute of the Motor Industry (IMI). This course is a blend of virtual learning and face to face practical sessions and assessment (with the respective Covid-19 protocols in place). Providing the very best learner experience to train and prepare you for the growth in Hybrid and Electric Vehicle servicing and repair work in the future.

Get in touch to discuss your requirements and to book your place on this **FREE*** course

IMI Level 3 Award in Electric/Hybrid Vehicle Systems Repair and Replacement

This unique course will enhance your existing knowledge and understanding of electronic principles and develop your understanding and safely applying those principles to high voltage repair and diagnostic procedures.

All learners successfully completing this IMI Level 3 qualification will acquire significant core knowledge and skills and the ability to safely remove and replace Electric and Hybrid Vehicle high voltage components.
